# Volume XXIII, THE SCIENCE TEACHER

# Index—February through December 1956

## **Author's Index**

Albrecht, Joseph M. Techniques in Microscope Slide Preparation. April: 142.

Angell, George W., Jr. The Philosophy of Test Construction in Science. May: 175.

Babyock, Nicholas M. Magnetic Lines of Force. May: 205.

Baker, Carl G. Chromatography and Paper Electrophoresis. May: 192.

Barnett, Gladys R. and Benjamin J. Novak. Scientists and Musicians. September: 229.

Bayles, Ernest E. Is Science Teaching Scientific? February: 11.

Bennett, Thomas P. Cleaning and Purifying Mercury. March: 109.

Bennett, Thomas P. Force Feeding Snakes. November: 361.

Brem, Peter. It's Easier Than You Think! April: 153.

Brown, Kenneth E. National Enrollments in High School Science. March: 89.

Brown, Stanley B. The 1956 Science Achievement Awards Program in Region VII. November: 332.

Bryan, W. Ray. The Induction of Cancer by a Virus. March: 97.

Burdick, Allan B. Thrilling New Advances in Visual Aids. September: 237.

Burton, M. S. Metallurgical Engineering as a Career. March: 83.

Caldwell, Loren T. Earth Science Principles in the Secondary School. April: 133.

Carr, Roman R. An Ampule Reagent Rack for Semi-Micro Chemistry. November: 357.

Cassavant, Joan. Camera Craft: Make Your Own Demonstration Model. October: 290.

Chambers, Randall M., Sherman Ross, and Victor H. Denenberg. Development of High Level Science Talent. October: 279.

Coutant, Madeleine F. Evaluation Sheet for a Student Science Project. May: 206.

Cressman, Harry E. Determining the Frequency of a Vibrating String. March: 107.

Denenberg, Victor H., Sherman Ross, and Randall M. Chambers. Development of High Level Science Talent. October: 279.

Denslow, Cornelius. What Happens If—? December: 385.

Dollahon, Virgil C., Arthur Houston, Flora Kahme, and Herbert McMillen. A Keyhole Look at Science Fairs. November: 328.

Doty, Robert G. A Different Quiz Procedure. April: 153.

Dressel, Paul L. The Challenge. February: 23.

Dubins, M. Ira. Pressure Variation and the Radiosonde. December: 420.

DuBridge, Lee A. Science—The Endless Adventure. October: 273.

Dunnington, F. G. Nuclear Energy. April: 129.

Easter, Ronald R. Today's Psychology Can Help Teachers Teach. May: 179.

Eiseman, Frederick B., Jr. A Saturating Core Reactor for the Physics Laboratory. October: 282.

Eiseman, Frederick B., Jr. Teaching Radio in High School Physics. December: 388.

Fischer, Richard B. How to Evaluate a Field Trip. November: 330.

Fitzgerald, Dorothea. Transplantation of Tumor Tissue. April: 143.

Frazier, Lynn E. Throw the Switch! October: 293. Gantert, Robert L. Pets, Parents, and Children. May: 188.

Goering, Marjory and Ray A. Woodriff. A New Method of Presenting the Gas Laws. December: 302

Greenfield, Robert E. Demonstration of Enzyme Activity. May: 190.

Greenlee, Julian. Effective Learning Through Science Investigations. February: 15.

Haney, Melva M. Science Crossword Puzzle. May: 207.

Hollenbeck, Irene. A Problem-Solving Approach in Biology. February: 17.

Houston, Arthur, Virgil C. Dollahon, Flora Kahme, and Herbert McMillen. A Keyhole Look at Science Fairs. November: 328.

Hudson, Douglas and Robert McCafferty. A Self-Starting Siphon. March: 109.

Ihde, Aaron J. The Development of Scientific Laboratories. November: 325.

Kahme, Flora, Virgil C. Dollahon, Arthur Houston, and Herbert McMillen. A Keyhole Look at Science Fairs. November: 328.

Keeslar, Oreon. Do Their Scientific Methods Show? February: 21.

Keeslar, Oreon. The Science Teacher and Problem Solving. February: 13.

Lawrence, James G. Insects in the Classroom. October: 286.

Leighton, Joseph. Tissue Culture. April: 139.

Light, Israel. Incorporating Cancer Information in the Secondary School Science Program. March: 93.

Lippincott, William T. and Richard M. Sutton. College Teachers Look at High School Science. May: 184.

Long, Robert H. An Apparatus for Introducing the Principle of Polarized Light. September: 243.

Lowe, Janet M. Polio Education: A Live Study for the Classroom. September: 239.

Lynde, Carleton J. High School Physics in Popular Dress. November: 353.

MacCardle, Ross C. The Use of Prepared Microscope Slides in the Teaching of Science. March: 95.

Maul, Ray C. Is the Science Teacher Shortage a Curriculum Factor? May: 181.

McCafferty, Robert and Douglas Hudson. A Self-Starting Siphon. March: 109.

McMillen, Herbert, Virgil C. Dollahon, Arthur Houston, and Flora Kahme. A Keyhole Look at Science Fairs. November: 328.

Meadows, Edna L. Genetics a la Chinese Checkers. December: 422.

Munch, Theodore W. Display Areas and the Group Technique. November: 334.

Novak, Benjamin J. and Gladys R. Barnett. Scientists and Musicians. September: 229.

Poehler, Paul F., Jr. Adventures in Science. November: 333.

Porter, David D. Laboratory Savings. September: 243.

Powers, Glenn F. Student Reaction to Laboratory Work in Physical Science. May: 205.

Prehn, Richmond T. Genetics and Skin Grafting. May: 195.

Reid, James C. Radioactivity and Isotopic Tracer Studies. April: 137.

Riley, William R. An Improved Phase Change Demonstration. April: 155.

Ronan, C. A. The Talley Tercentenary. November: 355

Rosen, Sidney. A Century of High-School Science. November: 321.

Ross, Sherman, Victor H. Denenberg, and Randall M. Chambers. *Development of High Level Science Talent*. October: 279.

Rutledge, James A. An Introductory Bibliography on Problem Solving. February: 25. Schenberg, Samuel. Criteria for Sponsored Teaching Aids in Science Education. October: 277.

Schmatz, Robert R. Winter Nature Study. December: 387.

Sheek, Martha R. The ABC's of Bacteriology. December: 398.

Silber, Robert. A Holiday Matching Test. November: 359.

Smeltz, John R. Retention of Learnings in High School Chemistry. October: 285.

Smith, Keith. Trends in Junior High General Science. March: 86.

Smith, Malcolm. Amateur Radio in Science Teaching. May: 187.

Spencer, Donald. Endocrinology and the Effects of Hormones. May: 196.

Stollberg, Robert. Problem Solving—The Precious Gem in Science Teaching. September: 225.

Stotler, Donald W. Trends and Issues in Junior High School Level Science. September: 233.

Sutton, Richard M. and William T. Lippincott. College Teachers Look at High School Science. May: 184.

Thaw, Richard F. Culture Slides by the Week. September: 245.

Trieger, Seymour. Making Photographic Prints in the Classroom. April: 135.

Wallen, I. E. The Science Teaching Improvement Program (AAAS). December: 399.

Ward, Harold E. Problem Solving in High School Physical Science. February: 19.

Wendlandt, Wesley W. A Simple Model for the Structure of the Atom. December: 422.

Westmeyer, Paul. Teaching Chemistry the Easy Way. December: 397.

Wilson, Leland L. Longitude, Time, and Date. November: 357.

Woodriff, Ray A. and Marjory Goering. A New Method of Presenting the Gas Laws. December: 392.

Woolever, John D. Animals in the Science Classroom. December: 396.

# **Topical Index**

## **Education of Science Teachers**

High School Chemistry: Keeping the Course Up to Date—A Report by the 1956 Summer Conference for Wisconsin High School Chemistry Teachers. December: Insert, 401.

Problem Solving in Science Teaching—A Symposium Is Science Teaching Scientific? Ernest E. Bayles. February: 11.

The Science Teacher and Problem Solving. Oreon Keeslar. February: 13.

Effective Learning Through Science Investigations.
Julian Greenlee. February: 15.

A Problem-Solving Approach in Biology. Irene Hollenbeck. February: 17.

Problem Solving in High School Physical Science. Harold E. Ward. February: 19.

Do Their Scientific Methods Show? Oreon Keeslar. February: 21.

The Challenge. Paul L. Dressel. February: 23.

An Introductory Bibliography on Problem Solving.

James A. Rutledge. February: 25.

Science Projects as Stepping Stones to Careers in Science—A Report by the 1956 West Coast Science Teachers Summer Conference. November: Insert, 337.

Science-Related Mathematics Exercises—A Report by the 1955 West Coast Science Teachers Summer Conference. February: Insert, 29.

# **Elementary School Science**

Insects in the Classroom. James G. Lawrence. October: 286.

It's Easier Than You Think! Peter Brem. April: 153.

Magnetic Lines of Force. Nicholas M. Babyock. May: 205.

Making Photographic Prints in the Classroom. Seymour Trieger. April: 135.

Problem Solving — The Precious Gem in Science Teaching. Robert Stollberg. September: 225.

Throw the Switch! Lynn E. Frazier. October: 293. What Happens If—? Cornelius Denslow. December: 385.

Winter Nature Study. Robert R. Schmatz. December: 387.

# Experiments, Demonstrations, and Pupil Projects and Activities

Camera Craft: Make Your Own Demonstration Model. Joan Cassavant. October: 290.

Determining the Frequency of a Vibrating String. Harry E. Cressman. March: 107.

Genetics a la Chinese Checkers. Edna L. Meadows. December: 422.

High School Chemistry: Keeping the Course Up to Date—A Report by the 1956 Summer Conference for Wisconsin High School Chemistry Teachers. December: Insert, 401.

Insects in the Classroom. James G. Lawrence. October: 286.

A Keyhole Look at Science Fairs. Virgil C. Dollahon, Arthur Houston, Flora Kahme, and Herbert Mc-Millen. November: 328.

Laboratory Exercises for the Life Sciences—A Series of Experiments, Demonstrations, and New Ideas. The Use of Prepared Microscope Slides in the Teaching of Science. Ross C. MacCardle. March: 95

The Induction of Cancer by a Virus. W. Ray Bryan. March: 97.

Representative Sources for Supplies. March: 99.
Radioactivity and Isotopic Tracer Studies. James
C. Reid. April: 137.

Tissue Culture. Joseph Leighton. April: 139, Techniques in Microscope Slide Preparation. Joseph M. Albrecht. April: 142.

Transplantation of Tumor Tissue. Dorothea Fitzgerald. April: 143.

Demonstration of Enzyme Activity. Robert E. Greenfield. May: 190.

Chromatography and Paper Electrophoresis. Carl G. Baker. May: 192.

Genetics and Skin Grafting. Richmond T. Prehn. May: 195.

Endocrinology and the Effects of Hormones. Donald Spencer. May: 196.

Making Photographic Prints in the Classroom. Seymour Trieger. April: 135.

Science Projects as Stepping Stones to Careers in Science—A Report by the 1956 West Coast Science Teachers Summer Conference. November: Insert, 337

A Self-Starting Siphon. Robert McCafferty and Douglas Hudson. March: 109.

Throw the Switch! Lynn E. Frazier. October: 293.

## FSA Activities

Administrative Committee. September: 253.

Booklet Services. February: 61.

Datelines and Deadlines. March: 105.

Encouraging Future Scientists: Keys to Careers. October: 300.

High School Chemistry: Keeping the Course Up To Date—A Report by the 1956 Summer Conference for Wisconsin High School Chemistry Teachers. December: Insert, 401.

Programs. March: 105. May: 211. September: 253. November: 367.

Roster of Sponsors. February: 61. March: 105. May: 211. September: 253. October: 299. November: 367. December: 427.

Science Achievement Awards for Students. February: 61. May (1956 Winners): 198. September: Insert. October: 299. November: 367. December: 427.

The Science Achievement Awards Program in Region VII. Stanley B. Brown. November: 332.

Science Projects as Stepping Stones to Careers in Science—A Report by the 1956 West Coast Science Teachers Summer Conference. November: Insert, 337.

Science-Related Mathematics Exercises — A Report by the 1955 West Coast Science Teachers Summer Conference. February: Insert, 29.

Science Teacher Recognition Awards. April: 145. Student Chart-Making Contest. February: 61. April: 159

Summer Activities for Teachers. February: 61. October: 299. December: 427.

Summer Conference for Wisconsin High School Chemistry Teachers. May: 211.

Tomorrow's Scientists. February: 61. April: 161. May: 211. October: 299. December: 427.

### History, Philosophy, Goals, and Objectives

A Century of High-School Science. Sidney Rosen. November: 321.

The Challenge. (Problem Solving in Science Teaching—A Symposium). Paul L. Dressel. February: 23.

College Teachers Look at High School Science. Richard M. Sutton and William T. Lippincott. May: 184.

The Development of Scientific Laboratories. Aaron J. Ihde. November: 325.

Do Their Scientific Methods Show? (Problem Solving in Science Teaching—A Symposium). Oreon Keeslar. February: 21.

Effective Learning Through Science Investigations (Problem Solving in Science Teaching—A Symposium). Julian Greenlee. February: 15.

An Introductory Bibliography on Problem Solving (Problem Solving in Science Teaching—A Symposium). James A. Rutledge. February: 25.

Is Science Teaching Scientific? (Problem Solving in Science Teaching—A Symposium). Ernest E. Bayles. February: 11.

The Philosophy of Test Construction in Science. George W. Angell, Jr. May: 175.

A Problem-Solving Approach in Biology (Problem Solving in Science Teaching — A Symposium). Irene Hollenbeck. February: 17.

Problem Solving in High School Physical Science (Problem Solving in Science Teaching—A Symposium), Harold E. Ward. February: 19.

Problem Solving — The Precious Gem in Science Teaching. Robert Stollberg. September: 225.

The Science Teacher and Problem Solving (Problem Solving in Science Teaching — A Symposium).

Oreon Keeslar, February: 13.

Today's Psychology Can Help Teachers Teach. Ronald R. Easter. May: 179.

# Information for Science Teachers

The ABC's of Bacteriology. Martha R. Sheek. December: 398.

Adventures in Science. Paul F. Poehler, Jr. November: 333.

The Development of an Idea: Science Teacher Summer Research Assistantships. March: 90.

Fellowships for College Science Teachers. December: 419.

Fifty-Year Science Teacher Honored by Chemical Industry. May: 203.

The Halley Tercentenary. C. A. Ronan. November: 355.

Institutes, Conferences, and Fellowship Programs for Science Teachers. February: 27.

An Introductory Bibliography on Problem Solving
(Problem Solving in Science Teaching—A Symposium). James A. Rutledge. February: 25.

Metallurgical Engineering as a Career. M. S. Burton. March: 83.

National Enrollments in High School Science. Kenneth E. Brown. March: 89.

Nuclear Energy. F. G. Dunnington. April: 129.

Obourn New U.S.O.E. Specialist for Science. February: 24.

A Program of Academic-Year Institutes for High School Science Teachers: A Report on National Science Foundation Grants. December: 418.

Report of the New York City Advisory Committee on Science Manpower. December: 394.

Science Education in the Centennial of the Organized Teaching Profession. September: 241.

Science Teacher Achievement Recognition (STAR) Program. February: 55. March: Insert. May: 203. September: 251. October: 297. November: 363. December: 425.

Science Teacher Recognition Awards. April: 145.

The Science Teaching Improvement Program (AAAS). I. E. Wallen. December: 399.

Science—The Endless Adventure. Lee A. DuBridge. October: 273.

Scientists and Musicians. Benjamin J. Novak and Gladys R. Barnett. September: 229.

Teacher of the Year. September: 240.

The 1956 Science Achievement Awards Program in Region VII. Stanley B. Brown, November: 332.

#### Instructional Suggestions, Methods, and Materials

Adventures in Science. Paul F. Poehler, Jr. November: 333.

Amateur Radio in Science Teaching. Malcolm Smith. May: 187.

An Ampule Reagent Rack for Semi-Micro Chemistry. Roman R. Carr. November: 357.

Animals in the Science Classroom. John D. Woolever. December: 396.

An Apparatus for Introducing the Principle of Polarized Light. Robert H. Long. September: 243.

Camera Craft: Make Your Own Demonstration Model. October: 290.

Chromatography and Paper Electrophoresis (Laboratory Exercises for the Life Sciences). Carl G. Baker. May: 192.

Cleaning and Purifying Mercury. Thomas P. Bennett. March: 109.

Criteria for Sponsored Teaching Aids in Science Education. Samuel Schenberg. October: 277.

Culture Slides by the Week. Richard F. Thaw. September: 245.

Demonstration of Enzyme Activity (Laboratory Exercises for the Life Sciences). Robert E. Greenfield. May: 190.

Determining the Frequency of a Vibrating String. -Harry E. Cressman. March: 107.

Development of High Level Science Talent. Sherman Ross, Victor H. Denenberg, and Randall M. Chambers. October: 279.

A Different Quiz Procedure. Robert G. Doty. April: 153

Display Areas and the Group Technique. Theodore W. Munch. November: 334.

Earth Science Principles in the Secondary School. Loren T. Caldwell. April: 133.

Effective Learning Through Science Investigations (Problem Solving in Science Teaching—A Symposium). Julian Greenlee. February: 15.

Endocrinology and the Effects of Hormones (Laboratory Exercises for the Life Sciences). Donald Spencer. May: 196.

Evaluation Sheet for a Student Science Project. Madeleine F. Coutant. May: 206. Force Feeding Snakes. Thomas P. Bennett. November: 361.

Genetics a la Chinese Checkers. Edna L. Meadows. December: 422.

Genetics and Skin Grafting (Laboratory Exercises for the Life Sciences). Richmond T. Prehn. May: 195.

High School Chemistry: Keeping the Course Up To Date: A Report by the 1956 Summer Conference for Wisconsin High School Chemistry Teachers. December: Insert, 401.

High School Physics in Popular Dress. Carleton J. Lynde. November: 353.

A Holiday Matching Test. Robert Silber. November: 359.

How to Evaluate a Field Trip. Richard B. Fischer. November: 330.

An Improved Phase Change Demonstration. William R. Riley. April: 155.

Incorporating Cancer Information in the Secondary School Science Program. Israel Light. March: 93.

The Induction of Cancer by a Virus (Laboratory Exercises for the Life Sciences). W. Ray Bryan. March: 97.

It's Easier Than You Think! Peter Brem. April: 153.

Laboratory Exercises for the Life Sciences—A Series of Experiments, Demonstrations, and New Ideas. The Use of Prepared Microscope Slides in the Teaching of Science. Ross C. MacCardle. March: 95

The Induction of Cancer by a Virus. W. Ray Bryan. March: 97.

Representative Sources for Supplies. March: 99. Radioactivity and Isotopic Tracer Studies. James

C. Reid. April: 137. Tissue Culture. Joseph Leighton. April: 139.

Techniques in Microscope Slide Preparation. Joseph M. Albrecht. April: 142.

Transplantation of Tumor Tissue. Dorothea Fitzgerald. April: 143.

Demonstration of Enzyme Activity. Robert E. Greenfield. May: 190.

Chromatography and Paper Electrophoresis. Carl G. Baker. May: 192. Genetics and Skin Grafting. Richmond T. Prehn.

May: 195.

Endocrinology and the Effects of Hormones. Donald Spencer. May: 196.

Laboratory Savings. David D. Porter. September: 243.

Longitude, Time, and Date. Leland L. Wilson. November: 357.

Magnetic Lines of Force. Nicholas M. Babyock. May: 205.

A New Method of Presenting the Gas Laws. Ray A. Woodriff and Marjory Goering. December: 392.

Pets, Parents, and Children. Robert L. Gantert. May: 188.

Polio Education: A Live Study for the Classroom. Janet M. Lowe. September: 239.

Pressure Variation and the Radiosonde. M. Ira Dubins. December: 420.

A Problem-Solving Approach in Biology (Problem Solving in Science Teaching — A Symposium). Irene Hollenbeck. February: 17.

Problem Solving in High School Physical Science (Problem Solving in Science Teaching—A Symposium). Harold E. Ward. February: 19.

Radioactivity and Isotopic Tracer Studies (Laboratory Exercises for the Life Sciences). James C. Reid. April: 137.

Representative Sources for Supplies (Laboratory Exercises for the Life Sciences). March: 99.

A Saturating Core Reactor for the Physics Laboratory. Frederick B. Eiseman, Jr. October: 282.

Science Crossword Puzzle, Melva M. Haney, May: 207.

Science Projects as Stepping Stones to Careers in Science—A Report by the 1956 West Coast Science Teachers Summer Conference. November: Insert, 337.

Science-Related Mathematics Exercises: A Report by the 1955 West Coast Science Teachers Summer Conference. February: Insert, 29.

A Simple Model for the Structure of the Atom. Wesley W. Wendlandt. December: 422.

Student Reaction to Laboratory Work in Physical Science. Glenn F. Powers. May: 205.

Teaching Chemistry the Easy Way. Paul Westmeyer. December: 397.

Teaching Radio in High School Physics. Frederick B. Eiseman, Jr. December: 388.

Techniques in Microscope Slide Preparation (Laboratory Exercises for the Life Sciences). Joseph M. Albrecht. April: 142.

Thrilling New Advances in Visual Aids. Allan B. Burdick. September: 237.

Tissue Culture (Laboratory Exercises for the Life Sciences). Joseph Leighton. April: 139.

Transplantation of Tumor Tissue (Laboratory Exercises for the Life Sciences). Dorothea Fitzgerald. April: 143.

The Use of Prepared Microscope Slides in the Teaching of Science (Laboratory Exercises for the Life Sciences). Ross C. MacCardle. March: 95.

What Happens If—? Cornelius Denslow. December: 385.

Winter Nature Study. Robert R. Schmatz. December: 387.

#### Investigations, Research, and Fact-Finding Studies

A Century of High-School Science. Sidney Rosen. November: 321.

The Development of Scientific Laboratories. Aaron J. Ihde. November: 325.

Is the Science Teacher Shortage a Curriculum Factor? Ray C. Maul. May: 181. National Enrollments in High School Science. Kenneth E. Brown. March: 89.

Report of the New York City Advisory Committee on Science Manpower. December: 394.

Retention of Learnings in High School Chemistry. John R. Smeltz. October: 285.

Trends and Issues in Junior High School Level Science. Donald W. Stotler. September: 233.

Trends in Junior High General Science. Keith Smith. March: 86.

#### **NSTA** Activities

Apparatus and Equipment Committee. December: 426.

Atlanta Meeting. February: 57. Biology Committee. October: 297.

Boston NEA Conference. April: 157.

Business-Industry Section. September: 249.

Data Wanted (Science teacher lists, student enrollments). March: 103.

Executive Committee Actions. February: 57.

Field Activities. March: 103.

Grant for Physics Study. May: 209.

If You'd Like to Work Overseas. October: 268.

Life Members. May: 209. December: 393, 425.

Magazine Advisory Board Election. February: 57.

Meetings and Conventions Schedule (Looking For-

ward). December: 425. Membership Gains. April: 157. October: 297.

Moving Day at NSTA. March: 103.

National Convention, 1956. February: 59. March:

National Convention, 1957. September: 246. November: 365. December: 425.

National Convention, 1958. December: 425.

New Publications. April: 157.
